

Face the State 2012 – FIRST QUARTER 2012

1/1 Children's programs

1/8 KTVQ Host: Ed McIntosh

Guest was Dr Simon Atkins, PhD, who has appeared on the program previously discussing his theoretical relationship between electromagnetism, solar flares, and the earth's climate. The discussion began with a synopsis of the climate shifts worldwide, and Montana's climate shift to a windier, warmer climate with more volatile precipitation events.

Dr Atkins explained the Golden Phi ratio and how this sense of divine proportion can be found on everything from the shape of our galaxy to our faces. Dr Atkins related this to his recent studies in Nepal where he earned his second PhD, this one in alternative medicine. As a demonstration, Dr Atkins showed Tibetan singing bowls, and how they are being used to treat conditions such as post-traumatic stress.

The discussion moved to Dr Atkins book, Skyia, which explores Dr. Atkins' theories about the relationship of the energy of our minds and beings, with the world and universe around us. The discussion also covered his theories of Electro-Magnetic Induced Weather, based on the premise some types of storms are metamorphosized as a result of an electromagnetic discharge into the atmosphere. And we showed a graphic of his theory called AFC RiskIntelConnect which is an attempt to quantify different weather events and show their inter-relationship as a cause and effect.

1/15 KRTV Host: Shannon Newth

Guests: Bill Burgus-Cascade County Search and Rescue Commander,

James Hoiland-Greenup Owner/Avalanche training course instructor

They talked about avalanches in Montana

1/22 Children's programs

1/29 KPAX Host: Angela Marshall

Guest: Patrick Barkey, who is the Director of the Bureau of Business and Economics.

The Bureau will be in the midst of a series of economic seminars around the state

2/5 KBZK Host:

Guest:

2/12 KTVQ

Host: Jay Kohn

Guests: Becky Hillier, Rocky Mountain Hospice / Regional PR Director

Dan Carter, MSU-Billings media/government relations

Today's program focused on the Big Sky Honor Flight program, an effort to recognize American Veterans for their sacrifices and achievements by flying them to Washington D.C. to see the various War Memorials – at no cost. Top priority is given to WW II and terminally ill veterans from all wars.

Montana's Big Sky Honor Flight program is part of the Honor Flight Network – now 33 states strong. Volunteers are in the midst of a fund raising campaign to get their first flight off the ground.

The goal is to raise \$150-thousand by this spring. Neighboring states have been very successful – North Dakota has already funded 11 flights, Wyoming 9 flights.

We spoke at length about the fact that Montana has the highest number of veterans per capita of any state in the country. (102-thousand veterans in a state of 1 million people)

2/19 KRTV

2/26 Children's programs

Mar 4 Children's programs

3/26 Face the State

Host: Angela Marshall

Guest: Ray Nickless, National Weather Service
Hydrologist

During the month of March, we acknowledge Flood Safety Awareness Week. It's intended to highlight some of the many ways floods can occur, the hazards associated with floods, and what you can do to save life and property. On this edition of Face the State, Montana's News Station's Angela Marshall is joined by is Ray Nickless, a Hydrologist with the National Weather Service in Missoula. You can listen in on the conversation as they examine this year's flood season throughout Montana.
